Position	Life Support Fabricator
Facility	Oceans Design Inc
Location	Colorado Springs, CO
Job Summary	<p>An Aquaculture Systems Fabricator will work with our team to assemble filtration equipment such as biofilters, UV Sterilizers, Ozone disinfection systems, degassing towers, and more. They will learn to build water pumps, wire complex computer control systems to monitor and control aquatic systems, test various sensors measuring pH, Oxygen, water flow, etc. They will be actively involved in our R&D program to test different pieces equipment, and calculate equipment performance such as SOTR's, pH manipulation, solid removal efficiency, etc.</p> <p>Systems fabricator will work with our team by following design drawings to fabricate a given system. The systems are typically water tested at our facility for quality control, crated, and shipped to a job site. At times the systems fabricator may be required to receive the system at a clients facility, install, test, and train clients on the use of the system. Our clients range from Research Institutions, National Fish Hatcheries, Commercial Aquaculture Facilities, Zoos and Aquariums, to school programs for aquaculture education.</p> <p>Oceans Design takes a lot of pride in what we do and is composed of motivated passionate individuals. We're looking to add like minded individuals to our team where we can all prosper. We are located in Colorado Springs where the cost of living is low, a bounty of outdoor activities are right at your doorstep, national parks are everywhere, and we enjoy over 300 days of sunshine per year.</p>
